

I strongly oppose Governor's Bill 16.

It appears the main focus of this bill, as written, is to create additional bureaucracy, both on the State and local levels. I am at a loss as to how making more laws will deter criminals from continuing to break said laws, as they are existing laws.

It also appears the list of "assault weapons" has grown. This can only mean citizens who currently own some of these implements could become felons with the stroke of the Governor's pen.

Please reject this bill.
